

Anteo Group Assists Client Implement Several ERP Projects

INDUSTRY AND CLIENT PROFILE

The client is the leading provider of computerized payroll, transaction processing, data communications and information-based business solutions.

PROJECT

Anteo Group partnered with the client to augment Enterprise Resource Planning (ERP) implementation and upgrade teams.

CHALLENGES

The challenge for the client was to find Senior Technical and Functional ERP consultants in a short amount of time for varying contract lengths to join the implementation and upgrade teams.

VALUE AND RESULTS

Anteo Group has worked with the client for a long period of time and has followed the progression of its products as well as the technologies supporting those products. This history and experience allowed Anteo Group to provide consultants experienced with these proprietary technologies.

Anteo Group also trained consultants with similar ERP backgrounds, such as PeopleSoft or SAP, to become experts in the client's technologies. Anteo Group fully funded the efforts to train these consultants before they were placed on client projects.

Thus, Anteo Group provided the client with the ability to successfully upgrade and implement many of its projects on time and within budget.
